

Seagate Recovery Services Critical Response

Critical Response data recovery services from the most trusted name in the storage industry, 24/7, 365 days a year.

When you've lost your mission critical data due to disaster or other unforeseen circumstances, time is of the essence. Seagate Recovery Services provides the industry's most comprehensive Critical Response services to efficiently and effectively restore your organization's critical data - when and where you need it.

Seagate Recovery Services Critical Response Service recovers on-site and in-lab for all brands and formats:

- Network Servers RAID
- NAS
- SAN
- Backup Tape Sets

We also recover data from corrupt file sets in software platforms such as SQL, Oracle and Exchange Servers, custom applications and multiple types of file systems.

We provide instant access to our highly experienced data recovery technicians. Teams are standing by for immediate on-site deployment anywhere in North America.

Seagate Recovery Services Critical Response

Utilizing the industry's mostly highly advanced technology, we will immediately assess your data loss situation and work nonstop to stabilize your media and expertly restore your valuable data.

Client Service Excellence

Pricing

Pricing for Critical Response Services is determined during the initial phase of engagement and service is always 100% confidential. In most instances the Critical Response service engagement begins at \$5000.00 per day plus applicable expenses (e.g. airfare, accommodations, meals, etc. if on-site). Standard data recovery charges are applicable. The diagnostic fee is included in the Critical Response fee.
